

Highway Safety Section Analyzing Your Roads Check List

To analyze your roads, do the following:

1. Download the 'Analyzing Your Roads' Checklist
2. Go to [Traffic Records Data Report](#) link to answer your checklist data questions
3. Visit the [Planning page](#) to find solutions to your data issues for the checklist

A. Analyzing Your Area's Data

Fill in the rate for your parish for each of the areas below using the LA Data Map Web Page:

Roadway Departure	Intersection Crashes	Pedestrians Incidents	Train-Car Crashes	Work Zones	Crash Rate
					State Rate
					Local Rate

What percentage of crashes in your parish were linked to driver behavior?

Alcohol Related	Driver Distraction	Crash Rate
		State Rate
		Local Rate

B. Identifying Issues

From your data analysis, what do you determine to be your top three highway safety issues when compared to the state crash rate?

1) _____

2) _____

3) _____

C. Available Resources (Visit the [Planning page](#) to find solutions for this section)

In this section, please take each issue and analyze your needs using the following questions. One page on each separate issue should be filled out. Please use the website to answer the questions below.

Solutions	Training
What are some solutions to this issue?	What training resources are Available?
What are funding sources for these Solutions?	What funding is available to Supplement training?

Public Awareness Campaigns	Stakeholders
Is driver behavior a major cause behind Your issues?	Who are your current stakeholders in The safety process?
If yes, what programs and resources Are available to you?
